WT ATS-250 SKT1-250A 4P

The Automatic Transfer Switch Without/With Cabinet Main Function as follows:

ATS can automatically transfer load between the main power and the emergency power (generating set) without operator. When the main power fails or voltage drops below 80% of normal voltage, the ATS will start emergency generating set after a preset time 0-10 seconds (adjustable), and transfer the load to emergency power (generating set). Contrarily, when the main power recovers normal, the ATS will transfer the load from the emergency power (generating set) to the main power, and then stop the emergency power (generating set.)

Optional 1-ATS without Cabinet (Can be installed on the control panel Directly)

- Δ Small Size/Operator conveniently
- Δ ATS 63A-1100A with Economical Cost

Optional 2-ATS With Cabinet
