

WINT WT6120NC

AUTO START & AUTO MAINS FAILURE CONTROL MODULES

FEATURES

The WT6110NC is an Auto Start Control Module and the WT6120NC is an Auto Mains Failure Control Module suitable for a wide variety of single gen-set applications.

Monitoring speed, frequency, voltage, current, oil pressure, coolant temperature and fuel level, the modules will display warnings, shutdown and engine status information on the back-lit LCD screen and illuminated LED.

Both modules offer electronic (CAN) and non-electronic (magnetic pick-up/alternator sensing) engine versions and offer a number of flexible inputs, outputs and engine protections so the system can be easily adapted to suit a wide range of application demands.

The modules can be easily configured using the WT Configuration Suite PC software. Selected front panel editing is also available.
